LETTER FROM THE PRINCIPAL

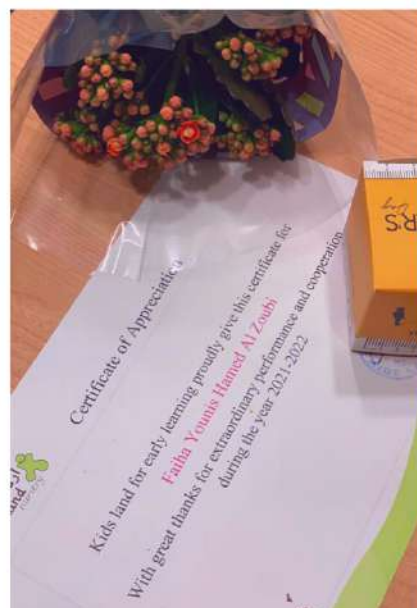

Autumn Term is always a time of transition; we say goodbye to the end of summer and embrace the change in seasons, as our children settle into new routines, and become more familiar with Kidsland Nursery. It is the right time to embrace change and start afresh! I have every confidence that the children will quickly fit into the team and support us to achieve our vision.

TEACHERS' DAY

THANK YOU

On Tuesday 5th of October, the nursery celebrated Teachers' Day, to show appreciation for the hard work and effort that they put through this year, and how they overcome the obstacles that they faced with Covid-19.

HEALTHY AND WEALTHY

This month we focused on Health. It's important to teach the kids why we should look for their health and hygiene. We taught them how to look after themselves and about healthy foods.

HYGIENE

The teachers taught them the importance of how to be clean and why they should look after themselves.

They did lots of activities for the kids such as:-

- How to brush their teeth.
- Washing hands before eating, and after eating as well as after playing or sneezing.

HEALTHY AND UNHEALTHY FOOD

This month the teacher focuses on healthy and unhealthy food themes to make them aware of what they can do to their bodies. Also, the teacher teaches them the importance of milk.

The teacher got creative with their crafts to make the kids learn in a fun way.

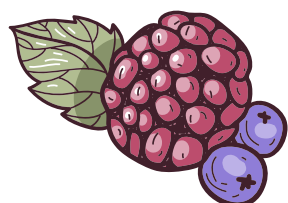

FRUIT AND VEGETABLE

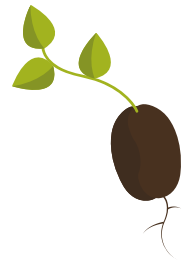

We teach our kids to differentiate between fruit and vegetable, also at the same time we teach them what we benefit from them and how they are good for our body. We do lots of fun with fruit and vegetable such as:-

- Playing with fruit and vegetable toys
- Outdoors and Indoor supermarket activity
- Coloring
- Match Making

PLANTING THE SEED!

Autumn's weather is really good for us to start planting the seed! We teach our children how plants grow by adding water and letting them stay under the sun, and why it needs the sun. Everyday, we let the children look after their plants to see how they are growing.

Pink Day

On the 20th of October, we organized a small event at the gate of the nursery for Breast Cancer Awareness Month. We would like to thank the parents for their time to be able to participate in the event. Thanks to Similac and Mediclinic for sponsoring this event.

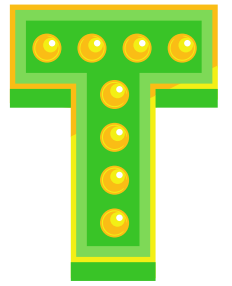

WE EVEN DID A
SMALL ACTIVITIES
FOR OUR
CHILDREN RELATED
TO PINK DAY!

LETTERS

The teacher teaches our children letters T and P with few Arabic letters such as ت, ح, ج, ث. We give our children pictures that start with those letters and teach them how to spell them and distinguish between them since some Arabic words are similar in shape.

2

NUMBERS

3

It is important to us that our children learn about numbers to develop their mathematical thinking, it helps them to keep things in order by counting! Each week they learn different numbers, this month our children learn numbers from 1 to 4.

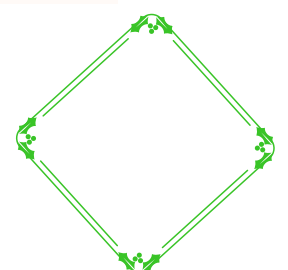

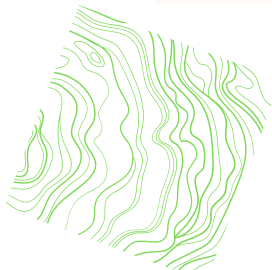

4

1

SQUARE AND GREEN

We combined the color green with the square shape! So, that whenever we want to introduce our children to the square, we also teach them the color green! We teach our children about how the lengths of the square are the same.

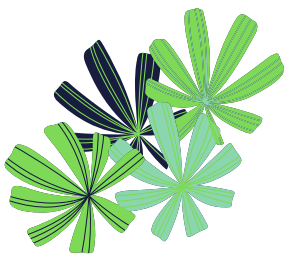

AUTUMN DAY

This month, our children learn about Autumn. They learn why leaves fall down and change colors, and we show them the beauty of Autumn and its weather.

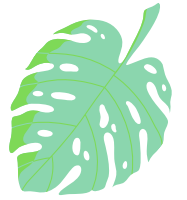

WE DID SMALL
OUTDOOR ACTIVITIES
SUCH AS COLLECTING
LEAVES AND PAINTING
FOR OUR
CHILDREN SINCE IT IS
NICE WEATHER OUTSIDE!
